

Mustafa Manhal

WEB DEVELOPER

Diyala Governorate, Iraq | 07715183095 | MustafaManhalcs@gmail.com

Summary

I am a web developer with hands-on experience in front-end development and UI/UX design. I build responsive, user-friendly applications using technologies like Next.js, React.js, and Figma. I enjoy solving problems and creating clean, practical solutions for real-world needs.

Education

University of Baghdad, Bachelor's degree 2020 Sep – 2024 Jul
Major: Computer Science.

Experience

Evolvm — Company Portfolio Website | Full-Stack 2024 Oct – 2024 Oct

- Developed the company portfolio website using React.js (frontend), Node.js (backend), and MySQL (database). Designed and implemented a responsive user interface with a focus on clean UI/UX for seamless navigation. The website highlights the company's custom software development services and reinforces Evolvm's brand as a reliable software solutions provider.

C++ Developer | Self-Study 2020 – 2022

- Developed foundational programming skills in C++, focusing on Object-Oriented Programming (OOP) principles and key language features. Gained hands-on experience with C++ syntax, data structures, and basic algorithms, setting a strong base for more advanced software development.

Projects

Lost & Found Web Platform | Graduation Project 2023 Nov – 2024 May

- Designed and developed a full-stack lost-and-found web platform as a graduation project from college. Applied the MVC (Model-View-Controller) architectural pattern across the entire project. Built the frontend using Bootstrap and EJS (Embedded JavaScript), and developed the backend using Node.js. Implemented user authentication, real-time item updates, and a login system. Managed the MySQL database using phpMyAdmin. Also created the complete UI/UX design to deliver a responsive and user-friendly experience across devices.

Training & Certification

The Odin Project | Full Stack JavaScript Path

2024 Oct – 2025

- Completed the React course and all prior coursework covering HTML, CSS, JavaScript, Git, and React. Built and deployed hands-on projects including a CV builder application and a memory card game, writing all code independently and publishing through GitHub and Vercel.

Korek Telecom | Korek Internship

2023 Aug – 2023 Aug

- Completed a summer internship at Korek Telecom, gaining hands-on experience in networking, marketing, and project management. Gained insight into the work environment of Iraqi companies and collaborated with professionals across multiple departments.

DNA Scholarship | Zain Iraq

2022 Aug – 2022 Oct

- Participated in Zain Iraq's DNA Scholarship focused on Flutter mobile development. Served as the back-end developer for the CarZone app, the final graduation project. Designed and implemented the Node.js API and managed the MySQL database using phpMyAdmin. Completed all backend development tasks within a one-month sprint, ensuring smooth data flow and performance for the Flutter frontend.

Skills & Abilities

- Next.js
- React.js
- JavaScript
- TypeScript
- Tailwind CSS
- Node.js
- MySQL / SQL
- Postman
- Git & GitHub
- Chrome DevTools
- Bootstrap
- UI/UX Design
- Figma
- Problem Solving
- Data Structures

Languages

- Arabic
- English
